Github	https://github.com/jomiloju7-spec
LinkedIn	https://www.linkedin.com/in/jomidareesan/
Career Objective	Chemical Engineering undergraduate with a keen interest in environmental engineering and sustainable industrial practices. My academic and practical training includes hands-on production experience where environmentally friendly material selection and cost-effective processes were central priorities, alongside exposure to industrial machining and process optimization. Eager to build a career that applies chemical engineering principles toward reducing environmental impact and supporting sustainable production systems.

EDUCATION

Start & End date	Degree
09/2023 - 07/2028	Bachelor of Science, Chemical Engineering, University of Lagos, Nigeria GPA: /4.00

PROFESSIONAL EXPERIENCE

Start & End date	Job position and description
-----------------------------	-------------------------------------

11/2025 - Present	Voices From the South Fellow, Sharing Stories affecting the World, CNN – Cable News Network, United States - Selected from over 10,800 applicants across 129 countries to participate in a transformative three-month journalism fellowship. - Completed advanced coursework via the CNN Academy Hub, focusing on storytelling, journalistic ethics, breaking news coverage, and field reporting. - Applied rigorous ethical frameworks to reporting, emphasizing accuracy, fact-driven environmental research, and objective storytelling. - Developed techniques for empathetic, field-based reporting to amplify authentic voices and build long-term audience trust.
01/2023 - Present	Head of Design – Protean Designs Gained foundational experience in archival research and records management in the Nigerian institutional context.

VOLUNTEERING

Date	Title
July 2026	Media Team Volunteer, The Industry Discourse (TID 5.0) Supported the media team in covering the event through photography, videography, and content creation for social media platforms. Assisted with real-time coverage during sessions and helped produce promotional material to boost event visibility and audience engagement.

PRESENTATIONS

Date	Title	Conference	Status/Location
Februrary 2026	Flow Measuring Apparatus - Investigated the dynamic response of a mercury-in-glass thermometer subjected to step changes in temperature (ambient to hot bath and back) - Derived and experimentally verified the first-order governing equation, extracting time constants for both heating and cooling phases. - Built dimensionless and semi-logarithmic plots to compare experimental data against theoretical exponential response curves and identified key sources of	Coursework Presentation	Completed/ University of Lagos

	systematic error (transfer delay, human reaction time, bath non-uniformity).		
--	--	--	--

July 2026	Response of a First-Order System to a Step Change Input and Ramp Function - Evaluated standard industrial methods for measuring the discharge rate of an incompressible fluid using a venturi meter, orifice plate, and rotameter. - Applied the continuity and Bernoulli equations to calculate volumetric flow rate from pressure differentials, then compared theoretical and actual flow rates through the discharge coefficient. - Calibrated the rotameter against a gravimetric weigh tank standard and assessed the relative performance and energy efficiency of each device.	Coursework Presentation	Completed/ University of Lagos

TECHNICAL PROJECTS

Project	Description	Technologies	Status
Repo Audit	A local Python project for auditing repository health and technical due diligence using a LangGraph workflow and repository analysis tooling.	Python, LangChain, LangGraph, Google Gemini, GitPython, Radon, Bandit	Completed

CERTIFICATIONS

Year	Certification	Institution
2026	Cybersecurity Defense Analyst Pathway Exam	Cisco Networking Academy
2026	AWS AI Practitioner Challenge	Udacity
2025	Food Product Development Training	Nestlé
2025	Solution Creation Training	Nestlé
2024	Virtual Assistant Course Completion	ALX
2024	Data Analytics Essentials	Cisco Networking Academy

HACKATHONS

Year	Hackathon	Institution
June 2026	USAII ® Global AI Hackathon 2026 • Certificate of Finalist at Graduate Level Track	United States Artificial Intelligence Institute (USAII ®)
August 2026	Frontier Engineering Challenge	Micro1

AWARDS AND FELLOWSHIPS

Year	Award	Institution
2025	CNN “Voices of the South” Fellowship	CNN
2025, 2026	Full-Tuition Scholarship	The Esan Family Trust Fund
2023	Full-Tuition Scholarship	The Oyefeso Family

PROFESSIONAL MEMBERSHIPS

Organization	Period
American Institute of Chemical Engineers (AIChE) Unilag Chapter	2023-present
Nigerian Society of Chemical Engineers (NSChE) Unilag Chapter	2023-present
Cowrywise Ambassador	2025 -present

TECHNICAL SKILLS

Programming Languages	Python, JavaScript, HTML/CSS, JSON, React-Native
Data Analytics	Excel, SQL, R, Tableau
Digital Humanities Tools	Flask, Git/GitHub, APIs, Command Line, Canva, Strapi
Database Management	Microsoft Access, Excel, Google Sheets
Project Management Software	Microsoft Office Suite, Google Workspace, Confluence, Asana, Slack, Monday.com
Media Processing	Audacity, HandBrake, SilverFast
